## Services Provided

Nowadays, numerous and various issues are being encountered worldwide, such as poverty, decline of biodiversity, water scarcity, food shortages, environmental pollution, decline in energy resources and global warming, among others. In reality, all these issues are connected through a mutual and complicated relationship, which makes it nearly impossible to solve all of them through just one project. Hence, OC Global has been adapting its strategies to take on a variety of projects worldwide, including new and innovative sectors. In accordance with each client's socio-economic requirements, OC Global has made it its mission to provide solutions in planning, design and management, suitable to a variety of challenges and formulated with the highest technical quality, while reflecting the ever changing needs of the market.

## Project Achievement / Technical Expertise

OC Global has been continuously engaged in major projects in more than 150 countries as a general consulting firm. We have been involved in projects related to transport planning, road traffic, rail transit, airport development, port and harbor development, agricultural and rural development, water resource development, smart communities, environment management, water supply, sewerage, waste management, energy development, peace-building, disaster prevention, land conservation, urban and regional planning, health and education facilities, tourism planning and development, landscape architecture, architecture, small and medium-sized enterprises (SMEs) support and sustainable development goals (SDGs) support. In addition to formulating various development plans that contribute to the improvement of the lives of people all over the world, we have provided a variety of consulting services for social infrastructure development, including roads, bridges, tunnels, urban mass transit systems, international airports and major ports, which are indispensable in improving all peoples' lives.
