Providing Services

We carry out research and study either independently or on commission on the following subjects.

- Construction Investment and Public Investment
 - Construction investment trends
 - Public investment policy and effect
 - Government procurement and Contract system
- Construction Industry
 - Construction industry policy
 - Analysis of construction industry management
- Housing and Urban Issues and National Land Policy
- Trends of Overseas Markets and International Comparison
 - We occasionally dispatch our mission to African countries.

Regular Publications

We make a variety of proposals for the Japanese construction economy by releasing the regular publications below.

- Construction Economy Report
(Japanese Economy and Public Investment)
 - Main publication which makes policy proposals on the ways of public investment and the construction industry based on economic and social conditions.
- Construction Economy Forecasts
 - Annual and quarterly construction investment forecasts based “‘ The construction economy model”.
- Analysis of the Settlement of Accounts
 - Analysis of the settlement of accounts of leading construction companies. We carry out financial analysis from a variety of perspectives based on statements or accounts,
- RICE Monthly
 - Monthly publications which provide the latest information on the construction market and the construction industry and offer a variety of proposals. It features a wide range of themes; from the construction industry in Japan and abroad to related industries and land issues.
