Providing Services

As of October 1, 2015, Daiwa Odakyu Construction Co., Ltd. and Fujita Corporation merged and transformed as the new Fujita.

We combine the knowledge of construction engineering we cultivated for more than 100 years of our corporate history. By combining each other's strength that we possess, we can do business in the field of urban revitalization, transport infrastructure service, and environmental engineering, both domestic and international. In addition, with Daiwa House Group's synthetic skills as our backbone, we are now able to provide answers to our customers as a total solution, in a much higher level than before.

【Business Details】

- Contracting, planning, design, supervision, and consulting services for construction projects
- Business operations related to the maintenance and management of buildings, structures, and their equipment
- Research, planning, design, management, and consulting services related to space development, marine development, community development, urban development, resource development, and environmental improvement
- Real estate appraisals and business operations related to real estate buying, selling, trading, leasing, and management as well as agent and mediation services etc.

Project Achievement/Technical Expertise

We have technological strengths (construction capabilities) for meeting the needs of customers overseas.

Fujita's international business launched in 1962 at Peru. Today, Fujita is top ranked in sales, among all Japanese general contractors in China, and Fujita has the No.1 evaluation as a Japanese general contractor in Mexico. And we are currently focusing African countries.

At Fujita, our personnel understand Japanese business practices as well as the worldwide local culture and systems, allowing us to construct reliable factories, logistics centers, residential and commercial facilities, high-rise buildings, and all kinds of infrastructure all around the globe.
