Providing Services

IHI Corporation is a comprehensive heavy-industry manufacturer working to create value in four main areas.

4 Business Areas of the IHI Group:

Construction and Maintenance for bridge and gate sector belong to the **Social Infrastructure & Offshore Facilities Business Area**, and these are conducted by **IHI Infrastructure systems Co., Ltd.** and **IHI Construction Service Co., Ltd.**, which are subsidiary companies of IHI Corporation.

Project Achievement/Technical Expertise

The IHI Group has engaged in **bridge construction for more than 135 years** and we are sufficiently **qualified with design, fabrication, construction, and maintenance for various types of bridges**, including suspension bridges. Aging infrastructure is the serious issue in developed countries. By utilizing the strength of possessing an inhouse engineering department, IHI has been carrying out **extremely difficult maintenance and life extension works**, such as **hanger cable replacement for suspension bridges** and **rebuilding under the condition of heavy traffic in urban areas**. In the **prevention maintenance field**, IHI has contributed to optimization of deterioration diagnosis and maintenance plans by **developing the digital technology for maintenance** and introducing this to the road administrators. Furthermore, IHI is also contributing to the improvement of the economic efficiency and safety of infrastructure by applying knowledges obtained from maintenance work for the entire life cycle of bridges to the design works of new bridge construction, which results in enhancing our engineering capabilities.

IHI shows its commitment to society in the field of **disaster prevention and mitigation** as well, through the method of providing the **temporary bridges** developed by IHI, for collapsed bridges caused by recent heavy rain or earthquake disasters.

IHI is the Japanese leading manufacturer of **dam gates and river gates** which covers all sectors including manufacturing, installation, maintenance. IHI contributes **water utilization and flood control business** not only in Japan but also in overseas, mainly in Southeast Asia.
