Project Achievement/Technical Expertise

Almost a Century ago, we SAKAI HEAVY INDUSTRIES, LTD. introduced the very first road roller ever built in Japan. As a pioneer in road construction equipment, we have continued our unflagging effort to innovate products together with technological research to meet the ever increasing of high grade Quality Infrastructure technology of Road construction and maintenance.

Also our proposal we will make technology transfer to civil engineer in developing country and establish to operate road management by themselves as own skill with our Stabilizer.

The Road Stabilizing Construction Method

- Cost-Saving ≡ ▼30%
- Carbon Emission ≡ ▼25%
- Construction Period ≡ ▼40%
