

Types of natural disasters: earthquake  
 Phase of natural disasters: early warning, emergency response

## Company profile

Established year :April24,2009  
 Capital: 13milyon yin  
 President: Kazuo Sasaki  
 Headquarter: Livera Shinokachimachi 4F, 2-14-4,  
 Kojima, Taito-ku, Tokyo, JAPAN, 111-0056  
 Foreign branches/offices:

Description of entire business: Development,  
 manufacturing of disaster-/security-related products  
 as well as systems

URL: <http://www.challengego.co.jp>

## Providing Services

We are a maker of disaster-/security-related products as well as systems.

1. Earthquake sensor alarm device EQ guard has sensor inside. It detects P wave and issue alarm immediately. So people can evacuate before big shaking arrives. EQ guard has specialized software to distinguish between earthquake and living noise generated close to EQ guard, which prevents from the issuing of

erroneous alarm. EQ guard issues alarm by selected language from 11 languages. EQ guard can display the seismic intensity of each observation point on the map at real-time.

Control signals of EQ guard can be issued to shut down chemical plants, nuclear facilities beforehand.

EQ guard can save people's life and infrastructure.

2. Wireless Emergency Report System "School Guard" when emergency situation occurred such as intruder enter the school, Teacher immediately pushes remote control and report to the teacher's room. Teachers rush to that room in rider to rescue students.

## Project Achievement/Technical Expertise

1,000 sets installed.

Japan:

Schools, kindergarten, nursery, Nursing home etc

Indonesia: Yogyakarta, Aceh Korea: Soul

Turkey, Romania, RNG, Kazakhstan ,India
