Comprehensive Solutions Provider in Power, Energy and Infrastructure

Toyota Tsusho Corporation (TTC) is a trading and investment arm of Toyota Group companies. TTC operates globally with 7 business divisions; 1) Metals, 2) Global Parts & Logistics, 3) Automotive, 4) Machinery, Energy & Project, 5) Chemicals & Electronics, 6) Food & Consumer Services, and 7) Africa. .

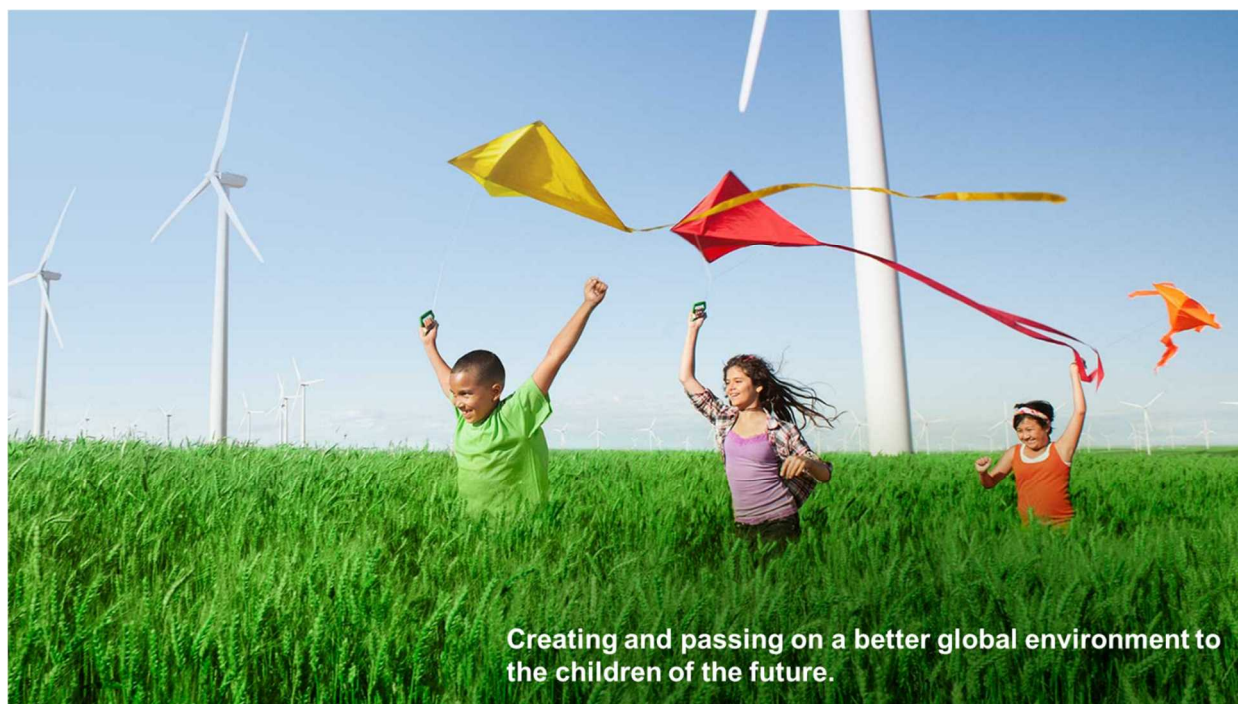

TTC has been actively developing projects in infrastructure sector all over the world; especially the Middle East, Asia and Africa where there have been many challenges in the people's life and industrial developments, and TTC has been there to find and provide the best solutions together with all the related stakeholders including government and local people. Such solutions are supported by Japanese Government's initiative of High Quality Infrastructure for the efficiency, the pro-environment and disaster prevention.

In 2017 TTC has established Africa Division to drive the business development in Africa. Under the slogan of **“With Africa, For Africa”**, we will continue our journeys as a solution provider in there as well.

TTC's footprints has been extended to varieties of infrastructures such as;

- Port development and operation
- Water infrastructure development
- Renewable energy; wind, solar, geothermal
- Power transmission facility
- Road, flyovers and traffic control systems

Wherever the challenges are, Toyota Tsusho shall be there to provide solutions

Creating and passing on a better global environment to the children of the future.
